

Mathera History Network — Freeze Sheet

Companion site · October 2026

Optional history companion linked to the app by Concept IDs. Learner Eras stay Roman (I–VII Count…Space). History Epochs use Chinese numerals 一–七.

EPOCHS LOCKED

Names lean Julius + Math Sensei: **ALGORITHM** (not Manuscript) and **COMPUTE** (not Electronic). Archaic forms (≡ for four, etc.) are companion-site easter eggs only; the app uses modern 一–七. Palette: warm scholarly, distinct from Origins–Modern.

—

MARK ■ #C68642

Mathematics can be stored.

tally · token · clay · glyph · numeral

≡

ALGORITHM ■ #B08A3E

Mathematics can be proceduralized.

counting board · positional numerals · zero · tables · astrolabe

五

MECHANIZE ■ #8C7352

Mathematics can be embodied.

slide rule · planimeter · mechanical calculator · graph paper

七

INTELLIGENCE ■ #7B4558

Mathematics can increasingly search itself.

proof assistants · symbolic search · neural/AI reasoning

—

WRITE ■ #9A6239

Mathematics can be argued.

scroll · codex · diagram · compass · straightedge

四

PRINT ■ #A8483A

Mathematics can spread.

press · printed algebra · notation · log tables · charts

六

COMPUTE ■ #6E5A48

Mathematics can execute itself.

punch card · electronic calculator · PC · spreadsheet · CAS

■ #C68642 ■ #9A6239 ■ #B08A3E ■ #A8483A ■ #8C7352 ■ #6E5A48 ■ #7B4558

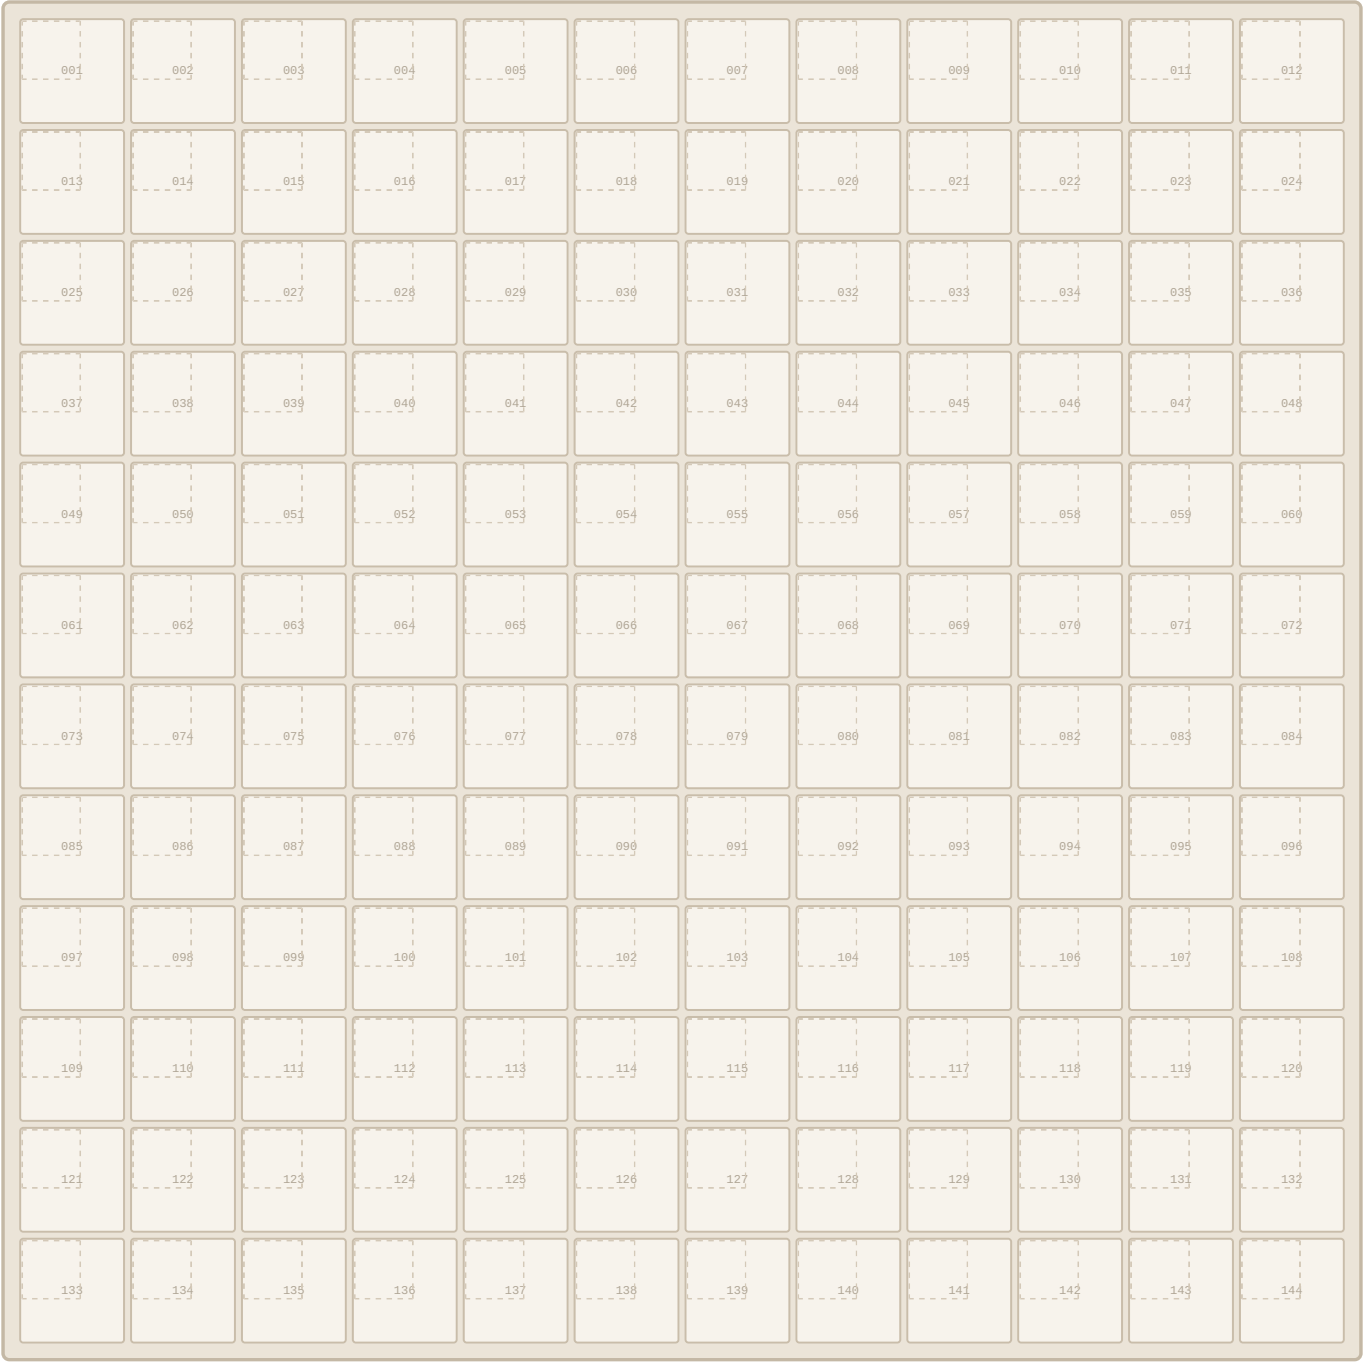

WORLDS ALL 12

Signature lines from History Network V2 brief. Worlds overlap in time and exchange ideas; they are not a ranking.

01 Mesopotamia Clay-tablet computation	02 Egypt/Eastern Mediterranean Survey, measure, record
03 Greek/Hellenistic Proof and geometric structure	04 China Algorithmic state mathematics
05 India Numeral and computational abstraction	06 Baghdad/Islamic-Persian Translation → algebra → synthesis
07 Italian Commercial/Renaissance Merchant math becomes print math	08 Atlantic Scientific Revolution Instrument + experiment + symbolic mathematics
09 French Enlightenment/Revolutionary Mathematics becomes an institution	10 Central Europe 19th-c Abstract Rigor and structure
11 British Industrial/Engineering Mathematics as infrastructure	12 American/Global Computational Electronics → software → AI

TROPHY SHELF MOCK

Companion hub = this shelf. Click a trophy to open history. Empty placeholders for freeze; art ships later.

Mastery as resolution: 8×8 → 16×16 → 32×32 as historical forms unlock. Pixel art v1; enamel pin later. 12×12 = 144 Concept trophies (001–144).

EDITORIAL LAW
Follow what survived: **roots + breakthrough + transmission + industry + modern form**. Not first-person-wins. Attribution is a network (roots, discoverer, formalizer, notator, transmitter, popularizer, industrializer, disputed, modern form)—not a single inventor field.

CORE APP READINESS

- Skill → primary Concept (+ optional secondary)
- Per-learner Concept mastery figure
- Historical-form tiers unlocked by skills
- Stable Concept IDs + small export for companion

Explicitly not in this PDF: no full 144 era remap · no blurbs · no people bios. This sheet freezes names, colors, worlds, and hub metaphor only.
